

Instruction:

- You have to draw each of the pixels individually.
- You can not use any of the built-in functions to draw the figures rather you can use your existing implementation of the algorithms.
- Any kind of searching or help from the internet is prohibited. If you face any errors during runtime, you have to call out the invigilators, and in the presence of the invigilators, you can perform a search on the web.
- Copying any code from the web or other unapproved sources may result in expulsion from the exam.

1. Draw the following image. (65)

2. Draw the following cube. (35)
